

DeAR-GP 2

Appendix 1: Questions for stakeholder interviews	
Stakeholder interview questions (housing provider)	
Background	
Is there a formally agreed pathway for dementia case finding for staff in the housing scheme?	
Are carers well placed to identify people showing signs of confusion or memory problems over a period of time? (i.e. is there enough regular contact with residents)	
Stake Holders to involve in development	
Which stakeholders would we need to involve in the development? (<i>i.e. Memory service, Lead GP for Dementia, commissioners, nursing staff</i>)	
Development of tool and process	
Adoption (intention to adopt or initial implementation of intervention)	
Are there any local requirements that need to be taken into consideration? (i.e. cognitive scale used by GPs)	
Looking at the tool what adaptations do you think we will need to ensure the DeAR-GP is accessible for front line staff in housing schemes?	
How do you envisage this tool to be embedded in practice? (<i>i.e. algorithm to support the model, uploaded onto electronic system</i>)	
Implementation	
Acceptability (degree to which an intervention is perceived to be agreeable)	
How can we ensure the tool is accessible to support staff?	
Feasibility (fit and suitability of the intervention for everyday use)	
What training and education will be needed to support staff to use this tool?	
Implementation Cost (costs associated with implementation, including cost of delivery of the intervention and cost associated with the implementation strategy used)	
Do you foresee any costs involved in developing and/or implementing the tool?	
Measuring the Outcomes	
Penetration (diffusion into practice), Sustainability (sustained use of the intervention)	
How can we ensure GPs are kept informed?	

DeAR-GP 2

How can we ensure the use of the tool will be measured?	
How can we ensure the outcomes will be measured?	
Overview	
What challenges do you foresee in the development and implementation?	
Going Forward	
Are you prepared to work with us to design and pilot this tool?
