South London

About us

- Health Innovation Network (HIN) south London, one of 15 HINs across England.
- We are the bodies uniquely established to connect NHS and academic organisations, local authorities, the third sector and industry, in order to increase the spread and adoption of evidenced innovation across large populations, at pace and scale.
- HIN south London is an NHS Organisation hosted by Guys and St Thomas' NHS Foundation Trust
- We are working closely with UK-wide partners to ensure reach and support is equitable

"We are uniquely suited to provide innovators and health and care organisations with the expert guidance and practical support required to undertake meaningful digital transformation projects"

Our values

As an NHS organisation we have a deep and direct understanding of the health & care system

Our capabilities

As a multi-professional team with networks across public, private and third sector we can bring the breadth of experience and skills

Our approach

We are agile and flexible, with a track record across a range of clinical pathways and digital themes

Impact - since 2018, Health Innovation Network national initiatives have:

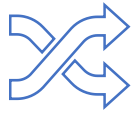

- Benefited more than **2.3 million patients**
- Contributed more than **£1.8 billion** to the UK economy
- Created or safeguarded more than **6,600** jobs
- Delivered a return on investment of **£3 for every pound**

Extended Reality x Mental Health

XR refers to extended reality, and covers:

Augmented Reality combines the real world and computer-generated content

Mixed Reality is a blend of human, computer, and environmental interactions

Virtual Reality is a simulated experience that gives the user an immersive feel of a virtual world

Haptics stimulates the senses of touch and motion - often requires a special suit

Interfaces enable real-time interaction among multiple users within a virtual environment

Platforms

Software

Mental health in numbers

1 in **6**

adults will have experienced a common mental health disorder in the past week

Severe mental illness (SMI) such as **schizophrenia** or **bipolar disorder** affects about

half a million
adults in England

(based on GP registers)
