

2025 Cardiometabolic Fellowship Programme

The Health Innovation Network (HIN) South London is excited to announce the launch of the **2025 Cardiometabolic Fellowship Programme**.

Join us to become a champion for cardiovascular disease (CVD) prevention and diabetes care in your practice and primary care network (PCN). This programme is suitable for all health care professionals working in primary care or community pharmacy regardless of your existing knowledge of CVD or diabetes. The Fellowship aligns to local priorities and supports practices and primary care networks (PCNs) in meeting their Quality and Outcomes Framework targets, reducing health inequalities, and reducing risk to your patients.

Running from **April 2025** to **November 2025**, the Fellowship will consist of:

Clinical webinars led by experts covering heart failure, lipid management, hypertension, chronic kidney disease (CKD), atrial fibrillation, diabetes and more.

An **in-person training day** to help develop your quality improvement skills on Thursday 24th April 2025. Attendance at this day is a requirement of the Fellowship.

Ongoing **peer and expert sessions** to support you in delivering your project, which will run June to October 2025.

A **final in-person event** in to celebrate the work of the Fellowship on Thursday 27th November 2025.

CPD-accredited learning

This is an invaluable fellowship. I have found working with the HIN extremely beneficial and positive. Meeting others working across London has been fantastic and the HIN team are really supportive.

Why join?

By joining our Fellowship Programme, you will:

Build your expertise

Gain in-depth clinical knowledge of CVD prevention and diabetes care. With clinical webinars delivered by experts from south London on topics such as: heart failure, lipid management, hypertension, chronic kidney disease (CKD), atrial fibrillation and diabetes.

Network and Collaborate

Connect with colleagues from other practices and PCNs to share knowledge, exchange ideas, and collaborate on projects.

Undertake a quality improvement project

Receive support to implement a quality improvement (QI) project. Use evidence-based strategies to identify those at risk of CVD, improve the health outcomes of your patients and performance of your practice or PCN.

Gain CPD Accreditation

This course is accredited to contribute toward your Continuing Professional Development (CPD) requirements.

Requirements

The programme is **open to all clinicians** working in south London practices, PCNs or community pharmacy. This includes practice nurses, doctors, clinical pharmacists, physician associates, paramedics, and health care assistants.

There is no cost, however **participating staff are asked to commit to:**

Attendance at two in person days on Thursday 24th April and Thursday 27th November 2025.

Attendance at lunchtime online clinical webinars (with exception, these are recorded and may be watched afterwards should you be unable to attend).

Delivering a QI project in your practice or PCN. This will need approximately 4-6 hours a month and can also be used towards other work such as QOF targets.

Apply now

What to expect

Clinical webinars

Participate in clinical webinars led by clinical experts. Deepen your knowledge on topics such as heart failure, lipid management, hypertension, chronic kidney disease (CKD), atrial fibrillation, diabetes and the future of CVD care.

Quality Improvement training

Receive quality improvement training to support your QI project.

Run an improvement project

Receive support from HIN project managers and clinicians and as you plan and deliver a CVD quality improvement project. [View a sample of 2024 projects.](#)

We are particularly looking for projects which address detection and management in one of these areas:

- Heart failure
- Lipids
- Hypertension
- Chronic Kidney Disease
- Diabetes

100 per cent of participants agreed that they were more confident in delivering care to patients at risk of CVD following the programme.
